TOP 5 QUESTION (AMAZON,GOOGLE,SWIGGY,ZOMATO,FLIPKART,ANGELONE)

– PRAGYA RATHI

--Angel One – Find Users Whose Salary Increased by 10% from Last Year

```
select a.emp_id,a.emp_name
from employees a join employees b
on a.emp_id=b.emp_id and a.year=b.year-1
where a.salary*1.1=b.salary;
```

-- Amazon – Find the Second Highest Salary

```
with cte as(
select *, dense_rank() over(order by salary desc)  as rk
from employees)
select *
from cte
where rk=2
```

Dataset of AngelOne and Amazon question ➖

```
CREATE TABLE employees (
    emp_id INT,
    emp_name VARCHAR(50),
    salary INT,
    year INT
);

INSERT INTO employees VALUES
(1, 'Alice', 70000, 2022),
(2, 'Bob', 80000, 2022),
(3, 'Charlie', 90000, 2022),
(1, 'Alice', 77000, 2023),
(2, 'Bob', 88000, 2023),
(3, 'Charlie', 99000, 2023);
```

GOOGLE

```
CREATE TABLE purchases (
   user_id INT,
   purchase_date DATE
);

INSERT INTO purchases VALUES
(101, '2024-04-01'),
(101, '2024-04-02'),
(101, '2024-04-03'),
(102, '2024-04-01'),
(102, '2024-04-03'),
(103, '2024-04-01'),
(103, '2024-04-02'),
(103, '2024-04-04');

select * from purchases ;
```

-- Google – Find Users Who Made Purchases on 3 Consecutive Days

```
with cte as(
select * , lead (purchase_date,1) over(partition by user_id order by purchase_date) as next_day,
lead (purchase_date,2) over(partition by user_id order by purchase_date) as
day_after_next_day
from purchases )

select user_id
from cte
where datediff(day,purchase_date,next_day)=1
and datediff(day,purchase_date,day_after_next_day)=2;
```

Flipkart and Swiggy

```
CREATE TABLE orders (
    order_id INT,
    product_id INT,
    restaurant_id INT,
    price INT,
    quantity INT,
    order_date DATE
);

INSERT INTO orders VALUES
(1, 101, 201, 100, 2, '2024-04-01'),
(2, 102, 202, 150, 1, '2024-04-01'),
(3, 101, 201, 100, 3, '2024-04-02'),
(4, 103, 202, 200, 1, '2024-04-02'),
(5, 102, 203, 150, 2, '2024-04-03');

select * from orders ;
```

-- Flipkart – Get Product with Highest Total Revenue

```
with cte as(
select product_id,sum(price*quantity) as total_revenue
from orders
group by product_id),
